PROJECTS

Personal Portfolio Website

Designed and developed a responsive personal portfolio website to present my education, technical skills, academic projects and qualifications. The website includes interactive navigation, animated sections, project details, a downloadable CV and contact information.

- Technologies: HTML5, CSS3, JavaScript, Three.js, GitHub

Academic Software Development Projects

Completed individual and group assignments involving programming, database design, system analysis, user-interface development, testing and project documentation. Collaborated with team members to analyse requirements and develop practical solutions.

- Technologies: Java, C#, SQL, HTML, CSS and JavaScript

PROFESSIONAL DEVELOPMENT

- Continuously developing programming, web development and database skills through academic assignments and self-learning.
- Strengthened English language, academic writing, presentation and professional communication skills through the Diploma in English Language and Literature.
- Participated in university group projects involving teamwork, research, documentation and presentations.
